

STATEMENT OF PURPOSE

RS19746

This legislation increases the reimbursement to school districts for each student completing a public school driver education course. This increase is necessary to bring reimbursements in line with the revenues associated with this program, and to keep pace with inflation. The legislation also reduces the paperwork and reporting burden on school districts by making the reimbursement a flat amount per course completion.

FISCAL NOTE

No fiscal impact to the General Fund. Increasing the reimbursement from \$125 to \$150 per course completed will increase total distributions to school districts by approximately \$250,000. This will still leave the driver's training fund in a positive annual cash flow position
